### Microneedling

Collagen Induction Therapy- Micro needling is a minimally invasive skin rejuvenation procedure that helps minimize the signs of aging, improve the appearance of scars, stretch marks, pore size, fine lines, skin texture, hyperpigmentation, acne scars, promote cell turn over for increased collagen and elastin fiber production. This treatment can have 3-7 days downtime and is minimally invasive.

Skin Pen Facial-During this procedure the skin is cleansed and numbing agent is topically applied to skin. The SkinPen device is then used to create controlled micro-trauma to the skin. By doing this the skin is able to create collagen. This can help with acne scars, aging, product penetration, and texture. FDA recommends a minimum of 4 treatments for optimal collagen production.
